Science activity

SCIENCE

EXPLORING THE FIVE SENSES

TEACHER'S GUIDE

Suggested level: Grade 1
Subject: Science - The five senses

Give each child a copy of the activity sheet. Choose one of these two approaches:

1) Take the class to a garden, park or outdoor area. Children observe natural objects, then draw an example in each box to match the sense. For example: "I can smell... a flower!"

2) In the classroom, ask children to imagine what they might find in a garden. They draw their examples in the same way.

Afterwards, display the drawings or sit in a circle. Ask, "In the garden, I can see..." and invite each child to answer, taking turns around the circle.

Safety: Do not taste plants, soil or unknown objects. For the taste box, use a familiar food example from memory, or a teacher-provided food only after checking allergies and obtaining any required permission. Avoid touching unknown plants or animals.

A WALK IN THE GARDEN

Explore the five senses. Finish each sentence and draw an example.

Name: _____ **Date:** _____

School: _____ **Class:** _____

I can see...

I can hear...

I can feel...

I can taste...

Think of a familiar food. Do not taste anything from the garden.

I can smell...
